

Biometric Screening

Home Test Kit

HealthSource
Solutions

Private online results

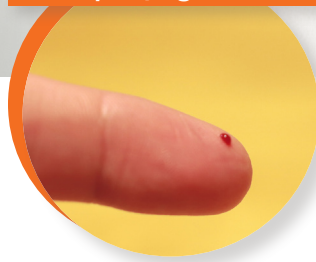

A convenient remote biometric screening option that employers can offer in addition to an onsite screening or as a stand-alone.

Kits mailed to home

Simple fingerstick

Mail kit to lab

How does the Home Test Kit work?

- **HealthSource Solutions** provides you with customized marketing materials (*timeline, FAQs, registration flyer*) to share with your employees.
- Kits are conveniently mailed directly to the employees' homes with written and video instructions to do a fingerstick.
- Employee mails the kit back to the lab.
- Lab results are available to the employee through a secure website 24 to 72 hours after being received by the lab.
- Lab results include the purpose of each test and interpretation of results.

What health metrics are being screened?

- Results will include measurements for: total cholesterol, HDL cholesterol (good cholesterol), LDL cholesterol (bad cholesterol), triglycerides, and glucose (diabetes screening).
- The kit does require employees to fast for at least 8 to 10 hours.

How much does a Home Test Kit cost?

\$45 per participant

25 MINIMUM ORDER REQUIREMENT. (No minimum if combined with an onsite screening event.)
\$20 REPLACEMENT KITS AVAILABLE.
